

Date of Bulletin:	December 9, 2024
Notice #:	CCBFTR02278
Audience:	Carrier, IXC, Wireless, CLEC, Reseller, ISP
Subject:	New Wholesale Ethernet Pricing Tiers
Date Effective:	Immediately

Frontier Wholesale is simplifying Ethernet pricing down to two base tiers (“Tier 1” and “Tier 2”). This change is designed to make wholesale Ethernet services easier to quote, order and install.

The two tiers are now determined by the distance to the splice point, with Tier 1 being closer in proximity and Tier 2 being farther away. This change better aligns with industry standards and provides more straightforward and predictable pricing. It also reduces installation time and construction costs for more customers.

As part of this initiative, we’re also launching a “Ready, Lit, Go” campaign, with a special promotional “third tier” (Tier 7) that offers customers an extra 25% discount on Ethernet services for select, on-net building locations.

The new pricing tiers and the “Ready, Lit, Go” promotional offering are available to Wholesale customers immediately.
